

CEANCI's mission is to prepare and invest in all students for career and college through partnerships that build innovative regional opportunities.

ABOUT US

CEANCI is a regional secondary vocational education system whose principal purpose is to prepare students for further education and/or entry into employment.

The System coordinates and financially supports programs for students enrolled in Automotive Technology, Engineering, Construction, Manufacturing, Culinary Arts, Child Development, Graphic Arts Technology, Health Science, Business and Technology, and Agriculture programs.

The System exists to provide high quality and current industry educational programs which are efficiently operated and accessible to all students who can benefit from them.

Invitation

Business and Information Technology Round Table

I skate to where the puck is going to be, not to where it has been.....

Wayne Gretsky

BUSINESS ROUND TABLE

January 22, 2014
9:00 am – 12:00 pm

Belvidere High School
1500 East Avenue
Belvidere IL 61008

CEANCI invites you to participate in a **Business and Information Technology Round Table** on *January 22nd at Belvidere High School from 9 am to noon (lunch will be provided).*

This event marks groundbreaking work with a systemic approach to the development and improvement of career and technical high school curriculum. By providing the foundation for strong partnerships between education and industry, our goal is to support program improvement, curricular and instructional change, and alignment to local industry needs. Over the course of several years we'll be working on Business and Information Technology, Graphic Arts, Family and Consumer Science, Industrial Technology and Agriculture programs offered across the region.

Who does CEANCI benefit? We support career and technical education programs that serve high school students in fifteen high schools. CEANCI also supports CTE instructors and collaborates with business and higher learning to provide services to the ongoing improvement of student achievement.

Our first curriculum improvement strategy is to open lines of communication utilizing a business round table format. The curriculum-focused discussion provides high school teachers a platform to listen, learn and align to industry. I've provided some quick answers to common questions about the parameters of a BRT on an enclosed document with this invitation.

To participate, please contact my Administrative Assistant, Bethany Mead, by January 10, 2014, at **921-1650**, or contact her by email at

b.mead@rockvalleycollege.edu

I look forward to hearing your ideas and thoughts as we move forward preparing students for the challenges of the 21st Century workforce.

Sincerely,
Margie Hartfiel
CEANCI, System Director
